

This sections contains all Gross Domestic Product (GDP) publications about Rwanda. The growth rate of real gross domestic product (GDP) is a key indicator of economic activity. For each publication, the distribution gives the percentage contribution of agriculture, industry, and services to total GDP. It is usually calculated on both annual and quarterly basis as well. A key framework in national economic accounting is the Supply Use Table (SUT). An SUT presents a comprehensive picture of the structure of the economy of a country for a given year in terms of the supply and use of (demand for) all goods and services (products).
