Introduction

This Statistical Report on Formal External Trade in Goods covers the second quarter of 2024, the period running from April 2024 to June 2024. It is produced by the National Institute of Statistics of Rwanda (NISR) through the Department of Economic Statistics (DES) under the External Trade Statistics Team.

One of the key mandates of the DES is to compile, analyze, and produce statistics and information on the external trade sector following international recommendations. This report is compiled by NISR from the data collected by the Rwanda Revenue Authority (RRA), the Customs Department, in its routine activities of management, monitoring, and facilitating cross-border trade. They are processed using EUROTRACE and MS Access database management systems (DBMS).

To collect and compile formal external trade statistics, NISR relies on the General Trade System under which the recorded aggregates include all goods entering or leaving the country's economic territory except for simple transit trade.

Imports include goods brought in directly for domestic consumption plus goods imported into customs-bonded warehouses.

Exports cover domestic exports defined as goods of national origin, goods produced in the exporting country and nationalized goods.

Re-exports which are exported in the same conditions as imported or after undergoing minor operations which leave them essentially unchanged and include re-exports from customs-bonded warehouses.

Partner country is the last known country of destination for exports and the country of origin for imports by the time of compilation.

Valuation of imports and exports: Imports are valued on a CIF (Cost, Insurance and Freight) basis while exports and re-exports are valued on a FoB (Free on Board) basis.

Classification of commodities: Data are categorized by partner country and the international standard classifications such as the Harmonized Commodity Description and Coding System (HS) and the Standard International Trade Classification (SITC), all linked to the national Customs Procedure Codes (CPCs).

Furthermore, the compilation of External Trade Statistics abides by the recommendations of the International Merchandise Trade Statistics: Concepts and Definitions 2010 (**IMTS 2010**) of the United Nations Statistics Division (UNSD). Hence, the data for this report are compiled on IMTS 2010 basis (not to be confused with data compiled on Balance of **Payments or National Accounts basis**)
